

Ahtesham Ul Haq

Senior Unity Developer — Gameplay & Systems

Lahore, Pakistan | +92 334 4515110 | ahtesham47@gmail.com

linkedin.com/in/ahtesham-ul-haq-9319a197 | github.com/NatsuD77 | natsud77.github.io/AhteshamPortfolio

PROFESSIONAL SUMMARY

Senior Unity and C# developer with 8+ years and 30+ mobile and WebGL game projects across match-3, idle/management, simulation, physics and Web3 (Solana). Builds gameplay systems and reusable project architecture end to end, from design document and prototype to store-ready build, and works closely with product and marketing teams. Has led small development teams and mentored junior developers. Open to remote roles.

CORE SKILLS

Engine & Languages: Unity 2D/3D, C#, WebGL

Architecture & Patterns: SOLID principles, ScriptableObject-driven design, observer pattern, delegates and events, interfaces and abstraction, inheritance and polymorphism, generic classes, singletons, object pooling, wrapper layers for third-party SDKs

Data: Serialization and deserialization for save/restore systems

Performance: Unity Profiler, static and dynamic batching, light baking, occlusion culling baking, NavMesh baking and dynamic NavMeshes, texture optimization and compression

Platforms & Services: Android, iOS and WebGL; Firebase, rewarded/interstitial ads, in-app purchases, third-party SDKs and packages, Web3 / Solana integration

Design: Gameplay mechanics, level design, UI/UX flow, design documents

Leadership: Team leadership, Agile / scrum and sprint planning, project documentation, code review, mentoring

Tools: Git / GitHub, Jira, Asana, Trello, Heroku, Amazon S3

WORK EXPERIENCE

Senior Unity Engineer — Cross Jump Studios

03/2024 – Present

Small studio focused on quality mobile games | Lahore, Pakistan

- As the sole senior Unity developer, built 7 game projects, from management and simulation games to a 10-title puzzle collection, delivering production-ready builds to the product and marketing team for release.
- Built an event-hall management title that integrates match-3 and ring-sort mini-games into a single loop, plus a physics-based duel title.
- Prototyped market-trend concepts in 1–2 weeks and took full projects from concept to release-ready build in 4–8 weeks, depending on scope.
- Diagnosed and repaired non-functional legacy Unity code, restoring broken gameplay features.

Senior Unity Developer — Creative Distrix

03/2018 – 01/2024

Mobile game studio and IT services company | Lahore, Pakistan

- Developed 2D and 3D games for mobile and WebGL across hyper-casual, simulator, idle, match-3 and Web3 genres.
- Led a team of 3 developers, each owning a separate title: ran scrum and team meetings, maintained project documentation, guided solutions, and handled code review and testing.
- Built a reusable match-3 kit used across 4–5 titles and a cooking-game kit reused across 3 titles.
- Designed C# code architecture and project structure for new game codebases, applying SOLID principles, ScriptableObjects, interfaces and the observer pattern.
- Led and managed a 2-developer team on Rifters (WebGL game with Solana integration): documentation, scrum, meetings, task planning, code review, bug fixing and feature changes. Responsible for around 50 minor and major releases, deploying through a Git and Heroku pipeline, then monitoring the live game and handling live-ops issues. Also delivered Solana Winter War.
- Integrated Firebase, ad monetization (rewarded and interstitial) and in-app purchases.
- Defined UI/UX flow and authored design documents; fixed bugs and solved technical problems in close collaboration with the wider team.

SELECTED PROJECTS

- **Match-3 Kit** — reusable match-3 framework used across 4–5 titles (Creative Distrix)
- **Cooking Game Kit** — reusable framework behind 3 cooking-management titles
- **Rifters** — WebGL game with Solana blockchain integration
- **Event Hall Management** — management game with integrated match-3 and ring-sort mini-games
- **Gun Dual** — physics-driven duel game (Pistol Dual-style)
- **Hero Rescue** — GTA-style 3D open-world rescue game
- **Super Market Manager** — management simulation (Supermarket Simulator-style)
- **Idle Hotel Management** — idle / management economy game
- **Solana Winter War** — Web3 tower-defense game on Solana (Plants vs Zombies-style)
- **Hajwala Drift** — drift driving game

Also: Hole.io-style hyper-casual game, 3D cook-and-serve and 2D cooking management games, fashion dress-up + match-3, home design + match-3, and further simulation titles.

MENTORING

- Taught Unity game development to around seven students, who are now working professionally.

EDUCATION

BS Computer Science — University of Sargodha, Lahore

2013 – 2017

LANGUAGES

English (professional), Urdu (native)
